

Great Basin Incident Commander Conference Call Agenda

Date: 7 Aug 19

Note taker: Richard Anderson

Weather:

Great Basin
Coordination Center

***** High Risk for Lightning Wednesday and Thursday *****

***** High Risk for Wind on Friday *****

Today thunderstorms will be more widespread across the area as monsoonal moisture makes a northern push into the area. Of particular concern is the potential for dry lightning across southwest Idaho and central and northern Nevada. Further south and east today, moisture will be deeper, and in those areas, most storms will be accompanied by wetting rain. However, central and Northern Nevada and southwest Idaho have a greater potential for dry thunderstorms and gusty/erratic outflow winds. **High Risk** has been issued for parts of the area for today and Thursday for dry lightning/gusty outflow winds. Storms will continue overnight tonight into Thursday and will become more widespread again by Thursday afternoon across the entire Great Basin, but especially the northern half of the region.

GB MAC/GACC Coordinator:

NICC/GB: PL3

New Starts: 14 for 94595 acres

Large Fire Growth: 20792

IMT Capability: 1 T1, 0 T2, 1 T3

GACC Totals:

0 MAFFS

1 VLAT

7 Air Tankers

2 CL/Scoopers

28 SEATS

5 Lead

1 ASM

Helicopters: 9 T1, 9 T2, 19 T3

Smoke Jumpers: 1A Leads – 2, Bases - 2, # of SMKJ - 14

Crews: 21 T1, 34 T2IA, 11 T2

1

Fire: Corta

IC:

- Fire Size: 16862 acres/10%/325 crew/\$1.1 MIL
- Changes: Increased N/NE & W; active burning along NE flank
